

Alcoholic hand disinfectant for rapid hygienic and surgical hand disinfection
Free of perfumes and colourants!

Fields of application:

The hands of personnel in the health care sector are highly challenged. Therefore, it is very important to protect them from irritating influences and to take care for the skin. It is recommendable, especially for predisposed skin types, to use products free of perfume and colourants.

Manorapid® basic is a **ready to use, alcoholic** solution for the hygienic and surgical hand disinfection. The product is **free of perfume and colourants** and therefore very well suited for the application on sensitive skin. Effective caring and moisturising agents ensure excellent **skin compatibility** especially upon frequent use. These characteristics make Manorapid® basic also an ideal product for the use in the **pharmaceutical industry as well as in the food industry.**

Special characteristics:

- free of perfumes and colourants
- especially suited for sensitive skin
- very good caring properties
- broad spectrum of efficacy
- effective against **Noro-** and Rotavirus

Spectrum of efficacy:

- bactericidal
- yeasticidal
- tuberculocidal
- limited virucidal*

Recommendations for use:

| Test | Concentration | Contact time |
|--|---------------|--------------|
| VAH – Hand Disinfection DGHM / EN Standard Methods | | |
| VAH – hygienic hand disinfection DGHM / EN 1500 | undiluted | 30 s |
| VAH – surgical hand disinfection DGHM / EN 12791 | undiluted | 1.5 min |
| tuberculocidal | undiluted | 30 s |
| DVV / RKI Guideline – virucidal efficacy | | |
| limited virucidal* (inactivation of enveloped viruses) (incl. HIV / HBV / HCV) | undiluted | 15 s |
| Vacciniavirus | undiluted | 15 s |
| BVDV (Bovine Viral Diarrhea Virus) | undiluted | 15 s |
| Rotavirus | undiluted | 15 s |
| EN 14476 – virucidal efficacy | | |
| Norovirus (MNV) ^a | undiluted | 1.5 min |

* according to RKI recommendation, Bundesgesundheitsblatt 01/2004

^a murine Norovirus = surrogate virus for human Norovirus

Composition (active ingredients):

100 g contain:
63.14 g Propan-2-ol
14.30 g Propan-1-ol

Listing:

- VAH-list
- ÖGHMP-list

Application:

For the hygienic hand disinfection:
Rub undiluted product into hands and keep them moist for the entire contact time. Manorapid® basic is already effective after 15 seconds. According to the current state of the art we recommend a contact time of 30 seconds.

For the surgical hand disinfection:
Rub undiluted product into hands and lower arms and keep them moist for 1.5 minutes.
