Dermo Safe

Skin protection cream – pleasant protection for highly challenged skin

Fields of application:
The skin fulfills many important functions and is at the same time a highly sensitive organ; wet work and frequent washing, liquid-proof gloves as well as the contact with disinfectants and similar substances can affect the skin and cause long-term damages. Therefore, it is crucial to protect the skin not only with an effective skin care cream but also with a reliable and mild skin protection cream.

Dermo Safe is an innovative skin protection cream that is easily applied and absorbed quickly. It provides a reliable protection from work-related influences and straining environmental stress.
Dermo Safe forms a separating, water resistant, and invisible protective film that shields the skin from challenging impacts through aggressive chemicals and humidity.
It is free of colourants and parabens, and is suitable for all skin types.

Special characteristics:

- protects from dehydration
- water-repellent
- non-greasing and non-sticking
- penetrates the skin quickly

free of parabens, perfumes and colourants

Application:
Apply Dermo Safe before work shift, before wet work, before wearing gloves (for a long time) and after breaks sparingly (pea- to hazelnut-sized amount) to the skin. Rub in gently starting with the back of the hands. Pay special attention to the areas between the fingers, the finger tips, the edges of the hands, thumbs, nail folds, and wrists. Renew protective film more often in case of heavy challenged skin.

Ingredients:
Aqua, Stearic Acid, Cetearyl Alcohol, Dimethicone, Triethanolamine, Isopropyl Myristate, Magnesium Stearate, Cocamidopropyl Betaine, Lactic Acid, Phenoxyethanol, Benzoic Acid, Dehydroacetic Acid, Parfum.
